

Greg's Walkers Wool

A safe way in helping to prevent blisters

Put a lamb on the spit, or did we mean, put a lamb between the toes.....

Anyhow, both work just nicely, although the latter will be the best treatment for blisters, sores and soft corns between toes and on top of toes. Wrap toes in lambs' wool to protect them from shoe pressure or adjacent toes. Use the wool to separate toes or cushion foot pads or to pack heel displacement. Lambs' wool applies soft, smooth, even pressure to toes and other parts of the foot. It is safe, breathable, absorbent and is 100 percent natural. And on top of all that, there is no need to throw it away after you have finished with it. To reuse simply hand wash in cold water.

Greg's Walkers Wool has been produced from Merino sheep. These sheep are sought after for their coats, which are said to produce the finest softest wool available. The wool is often used in athletic garments, as it breaths and wicks better than most synthetic fabrics. This wool type does not retain odours - bacteria cannot find a solid surface to grow on, thus making it antimicrobial and hypoallergenic.

Greg's Walkers Wool

Price: \$5.00 (20gm pack)

Did you know, *Walkers Wool is also sold under the brand name Hikers Wool which sells for \$16.00 per 40 gram pack.*

So what's in a name! Good old fashion Aussie pricing of course.
